

CRYPTO BIBLE

A must have for every crypto trader

Written By
Crypto Pastor
(A . L A W R E N C E)

THE BOOK OF GENESIS

1 IN the beginning Satoshi Nakomoto created Bitcoin and the blockchain tech-nology.

2 Blockchain technology giveth room for a decentralized atmosphere.

3 Blockchain technology is peer to peer, tis in thy hands.

4 Blockchain technology operates a trustl-ess system.

5 Blockchain technology is freedom.

6 Blockchain technology is hope for the hopeless.

7 Bitcoin is the mother of all other crypto currencies.

8 Cryptocurrencies are digital currencies, they are also called virtual currencies.

9 The cryptocurrency market does not discriminate, tis a free market, opened to every human.

10 Cryptocurrency is an asset class that can serve as a store of value.

11 Trading the crypto currency market can give thee financial freedom.

12 Investing in the cryptocurrency market can give thee generational wealth and edge against inflation.

THE BOOK OF BULLS

1 Bulls are joy givers, everything goes up in a bullish market.

2 Bullishness is a state of extreme pump.

3 Bullishness is a state where thee is expectant of the moon.

4 A bullish cycle is a period where profits are made.

5 Bullish cycle lasts for a long period of months, years

6 Bullish cycle is a period we all make it.

7 Thou shall not get carried away by the pumps and moon in a bullish market.

8 Thou shall always take profit as thy coins are being sent to the moon.

9 Everyone is a pro trader in a bullish market.

10 Thou must always respect the pump and not fight the trend.

11 For thou to be profitable, thou must buy every dips and correction in a bullish market as thy reward is in the reversal.

12 Thou must always spot assets with high potentials to maximize thy profits in a bullish market.

13 Thou must learn market psychology to know how thy fellow traders react to different market conditions.

14 Thou shall not buy the top

15 Thou shall not fall in love with a coin for love is blind

THE BOOK OF BEARS

1 The book of bears is the book of red.

2 The book of bears is the book of fear.

3 The book of bears is the book of uncertainty.

4 The book of bears is the book of doubt.

5 The book of bears is the book of risk management.

6 The book of bears is the book of stop loss, for it is thy best friend.

7 The book of bears is the book of capital preservation, for it gives thee chance to try again.

8 The book of bears is the book of consistency.

9 The book of bears is the book of the brave.

10 Thy mastery will be put to test in the bear market.

11 Thy resilience will be tested in the bear market.

12 Thy technical analysis will be put to test.

13 Thy fundamental analysis will come in handy.

14 Thy Patience will be tested in the bear market.

15 Thy faith shall be tested in the bear market.

16 Thy hodling spirit will be put to test in the bear market.

17 The media will your test your faith with FUD news.

18 The media will spread FUD to make you sell your bags.

19 While you're being FUDed away institutions will buy your bags.

20 Thou shall not sell to the FUD.

21 Thou shall not sell to the institutions for they don't want you to make it.

22 Thou shall not fret, for the green days are near.

23 The moon shall come again.

24 The green shall come again.

25 The euphoria shall come again.

26 Hold on tight for the paper hands shall FOMO on your bags.

27 The FOMO shall start soon.

28 Only diamonds hands shall get rewarded.

THE BOOK OF DEMAND & SUPPLY

1 The crypto market is structured by basic demand and supply.

2 Higher demand than supply for a particular crypto asset drives its price upwards.

3 Higher supply than demand for a particular crypto asset drives its price downwards.

4 Price moves sideways when demand is equal to supply.

5 Like every other traditional and Financial markets, price movement depends on demand and supply.

6 Demand can also be known as buying activity.

7 Supply is also referred to as selling activity.

8 Demand and Supply zones can be used by ye as a trading strategy.

9 Strong supply zones can help thee determine when to exit a trading position.

10 Strong demand zones can help thee determine when to enter a trading position that can make more profits.

11 Price normally goes upwards after a strong demand zone is formed on the candlestick charts

12 Price normally goes downwards when a strong supply zone is formed on the candlestick chart.

THE BOOK OF FOMO

1 FOMO is an emotion capable of burning thee.

2 The fear of missing out is one of the reasons portfolios get rekt.

3 FOMO giveth unto thee nothing but bad entries.

4 FOMO is chasing a pumping or pumped asset.

5 FOMO is an irrational decision.

6 FOMO is an unplanned decision.

7 FOMO is a temptation ye must avoid like a plague

8 Thou might lose it all chasing a pump.

9 Wise traders get in before the pump.

10 Thou must wait for good entry to avoid buying the top.

11 Noobs chase the pumps, they buy high and sell low.

12 What goes up must surely retrace.

13 Good entry comes at price correction.

14 Thou can't make it trading crypto without prior knowledge and understanding of the crypto market.

THE BOOK OF EMOTIONS

1 Crypto trading is emotion trading.

2 Fear, greed, uncertainty, euphoria, joy, doubt are emotions that affect all human traders.

3 Emotions can bless thee and rekt thee.

4 Emotions bless those who know how to control them.

5 Emotions rekt those who lack knowledge on how to control them.

6 Emotions can destroy a perfect trading set up.

7 Thou shall not answer to the calls of emotions.

8 Fear not for emotions are what makes thee human, they're in thy control.

9 A profitable trader is the one who knows how to control their emotions.

10 A profitable trader is the one who knows how to use emotions to their advantage.

11 Using emotion to thy advantage means buying when everyone is fearful and selling when everyone is euphoric

12 Emotions rekt those who sell when they are fearful and buy when they are joyful.

13 A trader gets the Joy of missing out when they resist a FOMO temptation.

14 A green candle is the bringer of joy and greed and FOMO

15 A red candle is the bringer of Fear, Uncertainty and Doubts.

16 If thou cannot control thy emotions, keep them in thy pockets.

THE BOOK OF **RISK MANAGEMENT**

1 Thou shall not risk more than you can afford to lose.

2 Never be caught off guard, always have thy stop loss.

3 Capital preservation is key to staying consistent in the crypto market.

4 Capital is preserved with proper risk management.

5 Dollar cost Average is a brother to stop loss, they both help manage risks.

6 Every trading decision is an idea, should incase thy idea gets invalidated, stop loss will help thee minimize loss.

7 Thy trade must be well planned before entry.

8 For every entry there must be a planned exit and invalidation point.

9 Thou shall not feel bad losing a trade, it's just an idea gone wrong, with proper risk management, there will always be liquidity to enter another trade.

10 Thou shall not put all thy eggs in one basket.

11 Though shall not move thy stop loss lower. Once invalidation is set.

12 Once you set thy trade leave it and let it play out.

13 Thou shall not get over exposed to the market, the fewer the positions the better.

THE BOOK OF PROFITS

1 The reward of every trader and investor is profits.

2 Taking profit is an art.

3 The patience trader milks the fatest profits.

4 All financial markets are designed to go up. Including the crypto market.

5 The volatile nature of the crypto market has given room for multiple profits.

6 Thou shall not get carried away by the pumps, take profits as thee go up to the moon.

7 Take profit and enjoy thyself, it is called self motivation.

8 Taking profit will give you liquidity to buy dips.

THE BOOK OF PREMIUM TEARS

1 Tears are of different variants, the premium type of tears can be found in the crypto sphere.

2 Premium tears are visible, some are inner tears.

3 Premium tears are bringer of pain and sorrow.

4 Every traders and investor must avoid premium tears at all cost.

5 Premium tears come from losing it all.

6 Premium tears is a result of gambling.

7 Premium tears is a result of debts.

8 Premium tears is a result of rekt.

9 Premium tears is a result of over leveraging.

10 Premium tears is a result of rugpull.

11 Premium tears is a result of liquidation.

12 Traders must always manage risk to avoid premium tears.

13 Thou shall not ignore stop loss for thy might end up crying premium.

14 O ye newbies stay away from futures and margin trading to avoid premium tears.

15 Traders with a gambling mindset will end up crying premium, for thy money shall go for vanishing.

16 Crypto trading is not Ponzi and
not a get rich quick scheme.

17 Thou must get premium
education to avoid premium tears.
